SUMMARY

Computer Science undergraduate specializing in AI/ML and software development with experience building LLM applications, computer vision systems, and data-driven solutions. Skilled in Python, C++, LangChain, LangGraph, and modern ML frameworks with strong foundations in algorithms, data structures, and software engineering.

EDUCATION

CHANDIGARH UNIVERSITY

B.E. IN COMPUTER SCIENCE

Expected May 2027

RSM INTERNATIONAL SCHOOL

JODHPUR

12th - PCM | March 2022

84.2%

MAHAVEER PUBLIC SCHOOL

10th - CBSE | March 2020

93.2%

TECHNICAL SKILLS

Languages:

• C++ • C • Python • Java

AI/ML:

• Machine Learning • Deep Learning
• NLP • LLMs • RAG

Frameworks:

• LangChain • LangGraph • FastAPI
• Streamlit • OpenCV

Libraries/DB:

• NumPy • Pandas • Scikit-learn
• SQL • SQLite

COURSEWORK

- Data Structures and Algorithms
- Object Oriented Programming
- Database Management Systems
- Operating Systems
- Probability and Statistics

INTERESTS

- Table Tennis - State Level Player
- Flute - Performed at school and public cultural events

PROJECTS

AI INTERVIEWER AGENT [Link]

PYTHON, LANGCHAIN, LANGGRAPH, LLMs, CHATGPT

- Engineered an AI-powered mock interview agent supporting 5 interview scenarios with LangGraph-based state management for adaptive multi-turn conversations
- Architected a 3-stage LLM pipeline for question generation, hint generation, and response evaluation using ChatGPT
- Designed an evaluation framework scoring responses across 4 criteria and generating personalized feedback with improvement recommendations
- Integrated text and sketch-based inputs to enable multimodal technical interview practice

SMART ATTENDANCE SYSTEM -- FACE RECOGNITION [Link]

OPENCV, SCRFD, INSIGHTFACE, ARCFACE, STREAMLIT, SQLITE

- Engineered a biometric attendance system comprising 5 modules: registration, face detection, recognition, voice verification, and reporting
- Optimized face recognition pipeline achieving 95 percent accuracy using SCRFD detection, InsightFace embeddings, and ArcFace similarity matching
- Integrated 2-factor authentication combining face and voice verification
- Created a real-time attendance tracking system with a Streamlit dashboard for enrollment, monitoring, and reporting workflows

EXPERIENCE

DATA ANALYSIS INTERN

ANAND RATHI, JODHPUR [Letter]

MAY 2025 - JULY 2025

- Analyzed stock market datasets during a 2-month internship using Python, NumPy, and Pandas to identify price trends, trading patterns, and market movement insights
- Established a 3-step data analysis workflow covering data cleaning, preprocessing, and exploratory data visualization for financial datasets and investment research reporting

ACHIEVEMENTS

- Codeforces Specialist [Profile Link]
- Achieved University Rank 1 in AMCAT among 5000 students Dec 2025
- Led 1st Runner-Up team in INSPIRATHON coding competition by Chandigarh University and CodeChef Aug 2025
- Led finalist team in AlgoArena coding event Sept 2025

CERTIFICATES

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA [Link] March 2026
- Andrew Ng - Machine Learning Specialization [Link] Dec 2025
- Andrew Ng - Deep Learning Specialization [Link] Dec 2025
- NPTEL - Cloud Computing [Link] June 2025
